INTRODUCTION

1. This table is in accordance with AR 310-60, and it will be the authority for requisition in accordance with AR 38-6540, and for the issue of all items of equipment listed herein unless otherwise indicated. This table rescinds all Tables of Basic Allowances, Tables of Equipment, and Tables of Organization and Equipment heretofore published except T/E 21, Clothing and Individual Equipment, so far as they pertain to the allowances of equipment for the organization and individuals covered by this table.

2. When there appears a discrepancy between the allowances shown in section II, Equipment, column 2, "Allowances" and column 3, "Basis of distribution and remarks," the amount shown in column 2 will govern.

3. Items of clothing and individual equipment, components of sets and kits, spare parts, accessories, special equipment, special tools, and allowances of expendable items, are contained in the following publications:

Army Air Forces.

Air Corps Stock List.

AAF Technical Orders of the 00-30-series.

Chemical Warfare Service.

Army Service Forces Catalogs, CW 1, 3, 5, 6, 7, and 9.

Allowances of Expendable Supplies, Army Service Forces Catalogs, CW 4-1 and 4-2.

Corps of Engineers.

Army Service Forces Catalogs, Engr 1-1, 2, 3-1, 3-2, 5, 6, 7, 8, 10, and 11.

Medical Department.

Allowances of Expendable Supplies, Series A.

Army Service Forces Catalogs, Med 1, 2, 3, 6, and 7.

Allowances of Expendable Supplies, Army Service Forces Catalog Med 4.

Ordnance Department.

Standard Nomenclature Lists (SNL), and Army Service Forces Catalog, Ordnance Supply Catalog, index to which is the Army Service Forces Catalog Ord 2 OPSI.

Cleaning, Preserving, and Lubricating Materials; Recoil Fluids, Special Oils, and Miscellaneous Related Items, Army Service Forces Catalog Ord 5 SNL K-1.

*T/A 23, Targets and Target Equipment.**Quartermaster Corps.*

T/E 21, Clothing and Individual Equipment.

Allowances of Expendable Supplies, Army Service Forces Catalog QM 4.

Components, Spare Parts, Accessories and Contents of Chests, Kits and Sets, and Other Items of Quartermaster Property, Circular No. 4, OQMG.

Army Service Forces Catalogs, QM 3-1, 3-2, 5-1, 6, 7, and 8.

AR 30-3010, Items and Price List of Regular Supplies Controlled by Budget Credits and Price List of Other Miscellaneous Supplies.

Signal Corps.

Army Service Forces Catalogs, Sig 3, 5, 7, and 8.

Authorized Signal Corps Parts Lists.

AR 310-200, Military Publications, Allowance and Distribution.

AR 775-10, Qualification in Arms and Ammunition Training Allowances.

4. This section is designed to provide organizations that differ in size and composition depending upon the tactical considerations involved; hence the table is composed of a number of different type battalion headquarters, company headquarters, platoon headquarters, sections, and teams. In consequence of this the "total allowances" are prescribed for the components of each organization instead of the complete organization. The activation order, or reorganization order, or augmentation order for such an organization will indicate the composition of the organization showing the quantity and type of each team.

5. In requisitioning equipment on the basis of this table the team composition of the organization and authority for such composition should be indicated on the requisition in order to facilitate checking of such requisitions by supply depots.

PART I—ADMINISTRATIVE

SECTION I

ORGANIZATION

Designation: +----- Signal Service Group
+----- Signal Service Battalion
+----- Signal Service Company (#)
+----- Signal Service Platoon (#)
+----- Signal Service Detachment (#)

Stenographer	213	5				(1)	(1)						

Company or platoon headquarters:
Grade 2 for over 55 vehicle equivalents
Grade 3 for 20 to 54 vehicle equivalents
Grade 4 for 10 to 19 vehicle equivalents
Grade 5 for 5 to 9 vehicle equivalents
d Also drives truck.
Composite units containing separate platoon or higher headquarters cells will be designated in accordance with the highest headquarters used. Each such headquarters unit (with the exception in note (1) below) will be designated separately whether an independent unit or part of an organization such as a battalion. When no headquarters cell is assigned, all teams will be designated +----- Signal Service Detachment (.....). (Parenthetical identifications will be used when further identification of a unit is necessary, but will be limited to the predominant function or functions of the unit. (See par. 5, AR 220-5, cs.) Such words in parentheses are not a part of the official designation. Examples are as follows:
(1) A unit consisting of Teams AC, AD, AH and AL would be designated as the Headquarters and Headquarters Company, Signal Service Battalion.
(2) A unit consisting of Teams 3-AA, AC, 6-EG and 6-GQ would be designated as Signal Service Company (Repair).
(3) A unit consisting of Teams AH, 2-DC and DG would be designated as the Signal Service Platoon (Message Center).
(4) A unit consisting of Teams AF and GM would be designated as the Signal Service Detachment (Wire).
(5) A unit consisting of one Team EJ would be designated as the Signal Service Detachment (Radio).
The headquarters units shown are authorized, subject to War Department approval, as follows:
Team AA—For the control of 2 or more teams when an integral part of the company,

Unit	Specification serial No.	Technician grade	Radio							Remarks
			Crystal grinding team	Mobile radio team	Radar installation and maintenance team	Radio-Boehme operation augmentation team	Radio carrier terminal team	Radio repair team	Radio telegraph fixed station 1-position	
Type			EA	EB	EC	ED	EF	EG	EH	
23 Powerman	166	5			(1)			(f 1)		EB. <i>Mobile radio team</i> —Operates and maintains any mobile radio installation.
24 Radar repairman, reporting equipment	953	3			(1)					
25 Radar repairman, reporting equipment	953	4			(1)					EC. <i>Radar installation and maintenance team</i> —Provides a basic radar installation and maintenance unit.
26 Radio operator	766	3		(1)						
27 Radio operator	766	4		(1)						ED. <i>Radio-Boehme operation augmentation team</i> —Provides personnel to operate a single channel radio station equipped for Boehme tape operation. May be used to augment any fixed radio station when this type of operation is required and personnel is not already provided.
28 Radio operator	766	5		(1)						
29 Radio operator	777	3				(1)			(1)	EF. <i>Radio carrier terminal team</i> —Designed to furnish personnel for 2 radio carrier terminals with associated wire carrier terminal equipment. These terminals will normally be installed up to 25 miles apart. When it is necessary to operate at greater distances or the terrain does not permit line of sight communication between the radio terminals, it is necessary to augment this team by 1 or more column EO, radio link repeater teams.
30 Radio operator	777	4				(1)			(f 1)	
31 Radio operator	777	5				(2)			(2)	EG. <i>Radio repair team</i> —Provides for 4th echelon repair and maintenance of radio equipment. This team can be used in conjunction with the storage and issue team, column CO, wire repair team, GQ, and radio installation
32 Radio repairman	649	4					(eg 2)	(2)	(f 1)	
33 Radio repairman	648	3					(eg 3)	(3)		EH. <i>Radio telegraph fixed station</i> —1-position provides personnel for the installation, operation, and maintenance of a single channel, fixed radio station, where the transmitter, receiver, and operation point are situated in one location.
34 Radio repairman	648	4					(dg 3)			
35 Radio repairman	648	5		(1)			(dg 5)			For specification serial numbers for officers see TM 12-406 and 12-407; for enlisted men see TM 12-427.
36 Repeaterman	187	3								
37 Repeaterman	187	4								and maintenance team, EC, to provide the functions of a signal depot organization.
38 Total enlisted			3	5	5	5	24	9	6	
39 Aggregate			4	5	5	5	26	9	7	EH. <i>Radio telegraph fixed station</i> —1-position provides personnel for the installation, operation, and maintenance of a single channel, fixed radio station, where the transmitter, receiver, and operation point are situated in one location.
40 O Carbine, cal. .30			4	5	5	5	24	9	5	
41 O Gun, machine, Browning, heavy barrel, cal. .50							2		1	For specification serial numbers for officers see TM 12-406 and 12-407; for enlisted men see TM 12-427.
42 O Gun, submachine, cal. .45							2		2	
43 O Mount, machine gun, cal. .50							2		1	EH. <i>Radio telegraph fixed station</i> —1-position provides personnel for the installation, operation, and maintenance of a single channel, fixed radio station, where the transmitter, receiver, and operation point are situated in one location.
44 O Trailer, 1-ton								1		
45 O Truck, 1/2-ton							2		2	For specification serial numbers for officers see TM 12-406 and 12-407; for enlisted men see TM 12-427.

Special equipment notes	(a)	(b)	(c)	(d)	(e)		(f)	

- a Crystal grinding equipment including supplies, accessories, spare parts and tools necessary to accomplish its function will be furnished by research and development division of the chief signal officer in accordance with special list prepared by the crystal branch of the Camp Coles signal laboratory.
- b The mobile radio team will be issued a radio set, power unit and additional equipment as required by the CSO. The chief of ordnance will furnish the chief signal officer with necessary vehicles and motor transport equipment for mounting equipment.
- c The radar installation and maintenance team will be issued tool and test equipment for equipment to be installed and maintained.
- d Additional equipment will be furnished to the team which this team augments on a project basis by the plant engineering branch, OCSigO.
- e Additional special signal equipment will be provided on a project basis by the chief signal officer.
- f Radio telegraph fixed stations will be furnished all necessary fixed plant signal equipment including antenna, power units, spare parts, tools, test equipment, and accessories to install, maintain and operate by the chief signal officer on a project basis.

Type			EI	EJ	EK	EL	EM	EN	EO	EP	EQ	ER	ES	
Radio repairman	649	5				(a 2)	(b 2)							40-KW 4-channel multiplex radio teletype station. This team must normally be augmented by 1 code room team, EQ; 2 code room maintenance augmentation ER; and 4 code room operation augmentation ES.
Radio repairman VHF	951	3			(2)									EN. Signal center team.—Provides personnel experienced in both our own and friendly army communication procedure, communication equipment, and language. It is for use at an allied army headquarters to expedite and simplify communications between our army and the allied army.
Radio repairman VHF	951	4			(1)									EO. Radio link repeater team.—Normally employed for radio link repeater stations which must be used between terminals, team EP, either because of distance or terrain features. It can be used as a radio link terminal in conjunction with spiral 4 cable team, GP.
Radio repairman VHF	951	5			(2)									EP. Single-channel radio teletype station.—Provides personnel for the operation and maintenance of the transmitting, receiving, and signal center positions of a single-channel fixed radio teletype station with power up to, but not including 40-KW. This team must normally be augmented by 1 code room team, EQ.
Radio repairman, single channel teletype	792	3					(1)			(1)				EQ. Radio teletype code room team.—Provides personnel for operation and maintenance of electro-mechanical cryptographic equipment used in code room for a single-channel radio teletype station. When more radio teletypewriter channels are employed, this team must be augmented by one or more, code room maintenance augmentation ER, and code room operation augmentation ES.
Radio repairman, single channel teletype	792	4					(1)			(1)				ER. Code room maintenance augmentation team.—Used to augment radio teletype code room team, EQ. Add 1 team, ER for each 2 additional radio teletype channels.
Radio repairman, single channel teletype	792	5					(2)			(2)				ES. Code room operation augmentation team.—Used to augment operators in radio teletype code room team, EQ. Add 1 team ES, for each additional radio teletype channel.
Receiving station attendant	776	3		(1)										For specification serial numbers for officers, see TM12-406 and 12-407; for enlisted men, see TM12-427.

a Radio telegraph fixed stations will be furnished all necessary fixed plant signal equipment including antennas, power units, spare parts, tools, test equipment, and accessories to install, maintain and operate by the chief signal officer on a project basis on approval of the WD.

b VHF Installation and maintenance team will be issued tools and equipment for installing and maintaining specific types of installation by the chief signal officer on a project basis on approval of the WD.

c Special signal equipment will be provided for this team on a project basis by the chief signal officer to include all tools, test equipment, power units, and spare parts, on approval of the WD.

d Special radio telegraph code room equipment including all tools, test equipment, power units and spare parts will be furnished on a project basis by signal intelligence service, and plant engineering agency, office of the chief signal officer, on approval of the WD.

magneto or common battery switchboard, including installation and repair of telephones. This may be 2-positions in separate locations but in the same general vicinity (such as 2-positions WE #12 or #550) (approximately 200 lines).

GD. 3-position switchboard team—For the purpose of operating and maintaining 3-positions of manual or common battery switchboard, including installation and repair of telephones. The 3-positions may be in 3 different locations but in the same general vicinity (such as 3-positions WE #550 or a TC-1) (approximately 300 lines).

GE. 200-station automatic switchboard—For the purpose of maintaining a 200-station automatic switchboard including operation and maintenance of a 1-position manual switchboard. This team is capable of installation and repair of telephones and can handle step by step, crossbar or all relay type switchboards.

GF. Switchboard installation team—For the purpose of making initial installation of magneto, common battery or automatic switchboards of any size. The entire team may be used to install a large switchboard or may be divided into as many as 4 teams for installation of small boards. The entire team can install a TC-1 (3-positions) in about 8 hours. It may be used at a depot repair shop to make major repairs on switchboards.

GG. Switchboard operating team—For operating only, a small 1-position switchboard or for augmenting one of the other switchboard teams where additional operating personnel only are required.

GH. Switchboard operating team—For the purpose of operating only, a 3-position switchboard or 3 1-position switchboards at different locations. It may be used to augment one of the other switchboard teams where additional operating personnel only are required.

carrier systems and/or 10 to 100 telephone repeaters including voice frequency telegraph systems and power equipment.

GO. *Telephone and telegraph installation team*.—Provides personnel to install all special toll equipment such as test boards, telephone repeaters, carrier systems, telegraph equipment, storage batteries, and power plant. It may be used at 2 separate locations or at a repair depot to repair telephone repeaters and carrier systems.

GP. *Spiral four cable team*.—Provides personnel to install, operate, and maintain, and repair a 100 mile spiral four cable system. However, if speed in the cable installation is required, the assistance of a signal construction company or the use of 1 or more teams, GM, should be obtained.

GQ. *Wire equipment repair team*.—Provides for 4th echelon repair and maintenance of wire equipment. This section can be used in conjunction with the storage and issue team (column CC), the radar installation and maintenance team (column EC), and the radio repair team (column EG), to provide the functions of a signal depot organization.

GR. *Submarine cable team*.—Provides personnel to operate and maintain a submarine cable terminal office having 1 terminating submarine cable. It may use siphon recorders or printers.

GS. *Heavy wire construction team*.—Provides personnel for building a complete two-mile long, open wire pole line with 2 circuits during 1 normal working day. The team can be divided into 3 crews operating on different sections of the line. All necessary tools are provided.

GT. *Light wire construction team*.—Provides personnel for the installation of field wire, rubber cable, a limited amount of open wire and the rehabilitation of existing open wire lines.

GU. *Light wire platoon headquarters*.—

a Not more than 50 percent of lieutenants within a numerically designated unit may be 1st lieutenants.
b Also trained as rigger.
c Also trained as Diesel mechanic.
HA. Airway equipment installation team—This team is to install a complete fixed airways station communication installation.
HB. Airway equipment maintenance team—This team is to perform major maintenance and repair on all airway communication equipment including certain 5th echelon work. This team will analyze faults in operation or functioning, repair if possible or initiate action for replacement if necessary.
HC. Labor team—Provided for the purpose of supplying laborers as required for installation of fixed radio stations where local civilian labor cannot be used or quartermaster service troops are not available.
HD. Airway weather equipment team—This team will install and provide major maintenance for all classes of weather stations required by the commanding general of the Air Force weather wing.
HE. Right of way construction team—

Semi-trailer, low bed, front loading, 20-ton					1				Semi-trailer, low bed, with dolly, may be substituted until subject item is available.
Templet, map, plastic, transparent, M-2	1	1		1	1				Equipped with: (a) Power control unit, cable operating front mounting, 1-Drum; (b) power control unit, cable operating rear mounting, 2-Drum, outside continental US when attd by T of Opns comdr.
Tractor, crawler type, diesel engine driven, 70 to 90 DBHP, standard w/bulldozer, tilting.									
MEDICAL									
Kit, First Aid, Motor Vehicle, 12-Unit					1				1 per 4 fuel consuming mtr vehicles or fraction thereof (except mtrcl and vehicle issued the 24 unit kit).
ORDNANCE Weapons and miscellaneous									
Carbine, cal. .30, M2	13	5	15	4	2	4	1	6	1 per indiv not otherwise armed.
Watch, wrist, 7 or 15 or more jewel	2	1		1				1	
Vehicles									
Truck, 6-ton, 6 x 6, prime mover, w/winch					1				

Motor transport equipment

Type	HA	HB	HC	HD	HE	HF	HG	HH	
Axe, handled, chopping, single bit, standard grade, 4 lb.					1				1 per fuel consuming mtr vehicle except combat vehicle, passenger car and mtrcl.
Chain, motor vehicle, tow, 16' long x 5/8" dia.					1				1 per fuel consuming mtr vehicle over 2 1/2 tons outside continental US when attd by T of Opns comdr except trk, 4-ton, 6 x 6, wrecker, trk, wrecking, hv, M1 and combat vehicles.
					or				or
Defroster and Deicer, electric, windshield					1				1 per 3 fuel consuming mtr vehicles in continental US as above.
Mattock, handled, pick, type II, class F, 5 lb.					1				1 per trk when attd by army or T of Opns comdr.
Shovel, general purpose, D-handled, strap-back, round point, No. 2					1				1 per fuel consuming mtr vehicle except combat vehicles, passenger cars, trk, 1/4-ton, 4 x 4, and mtrcl.
Tool Set, complete with tools:									1 per fuel consuming mtr vehicle except combat vehicles, passenger cars and mtrcl.
Cable Reel Mechanics									
General Mechanics	1	1							1 per 2 powerman (166).
Ignition Mechanics									1 per Diesel mech (013); powermen (166).
									1 per 2 powerman (166).

QUARTERMASTER
Individual equipment

Bag, Canvas, Field, OD, M-1936	13	5	15	4	2	4	1	6	1 per indiv.
Belt, Pistol or Revolver, M-1936	13	5	15	4	2	4	1	6	1 per indiv armed w/carbine or pistol; per indiv not otherwise furnished cartridge belt.
Cover:									
Canteen, Dismounted, M-1910	13	5	15	4	2	4	1	6	1 per indiv.
Canvas, Muzzle, Rifle or Carbine	13	5	15	4	2	4	1	6	1 per rifle, US cal. .30, M1903A3 or M1903A1, or carbine, when attd by CG, A or T of Opns comdr.
Pocket, Magazine, for Carbine, Cal. .30	26	10	30	8	4	8	2	12	2 per indiv armed w/carbine, cal. .30.
Strap, Carrying, General Purpose	13	5	15	4	2	4	1	6	1 per bag, canvas, fld, ed, M-1936 (strap, carrying, bag, canvas, fld, ed, M-1936 will be issued until exhausted).
Suspenders, Belt, M-1936	13	5	15	4	2	4	1	6	1 per indiv.

Organizational equipment

Axe:									
Intrenching, M-1910, With-Handle	1	1	1	1		1		1	1 per 10 EM outside continental US when attd by T of Opns comdr.
Handled, Chopping, Single-Bit, Standard Grade. Weight 4-lb.			4			1		1

1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type			IA	IB	IF	IG	IJ	IK	IL	IM	IN	IO	
Cryptographic repairman, class 1.....	801									(1)			operates independently but serves cryptographic production team IJ or IK. Flexibility in performance of machine processing functions is obtained by providing special types of equipment required in special cases and/or by using multiples of this unit.
Technician, grade 3.....	292	3	2	4	1	2	1	1	1		1	1	1G. Translators team.—Designed to augment radio intercept team IS or IT. The use of this team is dependent upon degree of success realized in cryptanalysis of enemy codes and ciphers contained in intercepted traffic. As more enemy cryptographic systems are solved, a greater percentage of linguists are required to translate messages into English language.
Technician, grade 4.....	292	4	5	11	1	2	1	3	1		2	1	1H. Cryptographic production and distribution team.—Prepares and distributes authorized cryptographic systems and cryptographic material for a task force approximately the size of an army, which is operating separately from a theater operations headquarters. This team augments the signal intelligence section of the task force in order to relieve the additional cryptographic burden imposed by having the task force operate the fixed communications system, as well as the tactical communications system.
Technician, grade 5 including.....	292	5	3	6	1	2	1	7	1		2	1	1I. Cryptographic production and distribution team.—Prepares and distributes authorized cryptographic systems and material required for communications within the theater other than those normally furnished by the War Department, exclusive of the lower level systems prepared within the tactical lower echelons. This team provides the basic unit required for establishing a new theater or operating a smaller theater. Augmentations of this team will be made as the communications requirements of the theater are increased by adding one or more of the cryptographic production team IJ.
Private, first class.....	405	5	1	2	3	1	2	2			1		1J. Mobile cryptographic equipment repair team.—Provides the required personnel, tools and spare parts for routine maintenance inspection and second and third echelon repair of electrical and mechanical cryptographic devices. This team is capable of maintaining all mechanical and electrical

CHANGES
No. 2

SIGNAL SERVICE ORGANIZATION

T/O & E 11-500, 22 September 1944, is changed as follows:
Columns indicated below are changed as follows:

PART I - ADMINISTRATIVE

SECTION I ORGANIZATION

Line	Column			
	1	2	4	5
Type.....			AA	AB
16 Composite unit commander.....		92902	(1)	(1)
32 Platoon.....		651	(1)	(1)
When unit has a predominant function, specification serial numbers will be appropriate to that function. Delete the following: Team AA.- For the control of 2 or more teams when an integral part of the company, except that platoon strength shall not be less than 40 individuals (not required when teams include commissioned personnel). Team AB.- The equivalent of 2 or more teams, except that the platoon strength shall not be less than 40 individuals. Add the following: Team AA.- Normally required for control of 2 or more teams of a strength of not less than 40 individuals, which operate as a component of a larger administrative organization and to which no officer is organically assigned. Team AB.- Normally required for control of 2 or more teams of a strength of not less than 40 individuals, which operate separately, and to which no officer is organically assigned.				

NOTE: Changes in the equipment section to this table are indicated by overtyping virgules (///) to delete previous listings and figures. New text material appears in all capitals. New figures are underlined.
