How to:

The PDF document is sized in A4 with no margins (margins = 0 cm) and with one A4 sheet you can make 6 notebook pages, and 3 fronts.

The examples (in black and white, I don't own a color printer) are made of 3 white A4 sheets + 1 craft cardboard (300 gr.) A4 sheet.

With normal white A4 paper, print the sheets and use a perforation cutter and a ruler to perforate the dotted lines. Then cut the black lines with a knife and you'll have 6 equal parts of paper.

Print the front on crafting cardboard and cut the black dotted lines from top to bottom with a knife and a ruler.

fold the front so the notebook pages fit inside and staple the top end with two staples.
